◆ MEDTECH INNOVATION MAP · DTU SKYLAB ↔ UNIVERSITY HOSPITAL

Bedside to Bench, and Back

Every route by which a clinician's real-world problem can meet a DTU student's engineering energy — from a corridor conversation to a validated tool back on the ward. Drawn from DTU Skylab's public programmes for students and startups, with the clinical side sketched in as the touchpoints a hospital would plug into.

HOSPITAL / CLINICAL · DTU SKYLAB / STUDENT · JOINT TOUCHPOINT · FUNDING

adoption raises the next clinical question ↺ back to spark

01 SPARK	02 EXPLORE & LEARN	03 BUILD & VALIDATE	04 FUND	05 LAUNCH	06 IMPACT
HOSPITAL **A clinician notices a gap** An unmet need, a workflow bottleneck, or a device limitation surfaces on the ward or in the clinic.	HOSPITAL **Clinical mentoring** Doctors share domain expertise, patient-safety constraints, and workflow context with the student team.	HOSPITAL **Real-world testing ground** Prototypes get checked against real clinical scenarios, with clinician feedback loops built in.	HOSPITAL **In-kind resources** Equipment access, anonymised data, or staff time offered as the clinical co-investment (institution-dependent).	JOINT **Clinical pilot** The hospital department pilots the near-market solution under real operating conditions.	OUTCOME **MedTech spin-out or adopted tool** A validated device, software, or process re-enters patient care — and surfaces the next clinical question.
JOINT · TWO RAMPS IN **Challenge brief or curiosity** Doctors can post a problem via **Open Innovation X**, Skylab's flagship interdisciplinary event; students arrive independently, drawn by curiosity.	JOINT · KEY BRIDGE **Life Science Academy** Skills-building and collaborator-matching for health-focused ideas — open to students and researchers alike.	JOINT **Skylab Minisprint** Design-tool sprint run with industry partners — a hospital department can sponsor one as a challenge sprint.	FUNDING **Skylab Funding** Soft funding for prototyping, testing & consultancy. `DKK 15,000–150,000`	DTU SKYLAB **Prototype2Market** Developer Hall residency, lab access, and a technical roadmap for research-based startups nearing commercialisation.	
DTU SKYLAB **In-Flight & Info Sessions** Low-commitment intro sessions covering entrepreneurship basics, ideation tools, and what Skylab offers.	DTU SKYLAB **Coaching & immersion** Open Door Coaching (no application — just show up) · EXPLORE Programme `2 mo · biannual` · Pre-startup Mentoring · Advisory Days.	DTU SKYLAB **Tech Support + Startup Programme** Prototyping facilities & Developer Hall engineering help, feeding into the 3-stage **Skylab Startup Programme** (coaching, leadership, business development).	FUNDING **Research-to-Business Grants** Discovery Grants · Proof of Concept Grants · InnoExplorer — moving lab research toward a commercial venture.		

HOW A DOCTOR GETS IN

- Post a problem as a challenge brief through **Open Innovation X** or a sponsored **Skylab Minisprint**.
- Register interest as a collaborator through the **Life Science Academy**, which explicitly matches researchers/clinicians with student teams.
- Host a **clinical pilot** once a team reaches Prototype2Market — this is the natural re-entry point for hospital involvement.
